Notes:

- * Indicates a facility with a high level of neonatal care (Level III), and therefore a destination facility for high risk deliveries.
Designation is as of December 2004 per <http://www.doh.wa.gov/hsqa/fsl/CertNeed/Docs/2004%20Perinatal-Neonatal%20Services%20LOC.pdf>
- ** Indicates number or percent has been suppressed to ensure confidentiality of individual level data.
- 1. **Medicaid women** had either Medicaid-paid maternity care or at least three months of capitated payments in the six months prior to delivery. This analysis excludes the few women who had a capitation charge during the month of delivery, but had no delivery charge and did not meet the First Steps Database criteria for Medicaid-Paid prenatal care/delivery. These women are reported as Non-Medicaid in other FSDB reports.
- 2. **Medicaid Managed Care (MMC)** includes 1) women who were enrolled in a managed care plan at the time of delivery, and 2) low income women enrolled in the Basic Health Plan and covered by Medicaid at time of delivery.
- 3. **Medicaid Fee-for-Service (MFFS)** includes women with Medicaid-paid maternity care who were not enrolled in a managed care plan at time of delivery.
- 4. **Medicaid Non-Citizen women (MNC)** include those who are not legally admitted for permanent residence, lack temporary residence status, are not lawfully present in the United States according to the provisions of the Immigration Act, or are lawful non-citizen permanent residents. Citizenship status is determined from Medicaid eligibility records. Qualified aliens who have resided in the U.S. for 5 years or more are eligible for regular Medicaid coverage, if otherwise eligible.
- 5. **LBW** includes total births weighing less than 2,500 grams for all liveborn infants (singletons and multiples). The denominator for the low birthweight rate is all liveborn infants, and the numerator is all liveborn infants weighing less than 2,500 grams.
- 6. **Other places of Birth** include military/naval facilities, home births, birthing centers, non-OB facilities, and out of state hospitals.
- 7. A small number of women who were non-citizens based on eligibility received managed care services. Therefore, the number of non-citizen FFS is slightly smaller than the overall number of non-citizens reported elsewhere.
- 8. Totals do not include suppressed numbers or the small number of women who had a capitation charge during the month of delivery, but did not meet the FSDB definition for Medicaid-paid prenatal care/delivery.
The total number of deliveries is therefore smaller than reported elsewhere.
- 9. Rates calculated from small numbers may be unstable and may fluctuate widely. Caution should be used when interpreting rates based on small numbers.
